9. COURSE 30	10. BRIEF SUMMARY OF SIGHTING Bright object bearing 330 deg, elev 60 deg with brilliancy of Jupiter moved directly overhead and emitted fire and fragments while continuing on course bearing 330 deg elev 60 deg at 1100. Bright red in color very slow motion. Duration of 11 minutes.	11. COMMENTS This is a continuation of KOKOY 100% record card. The date is 10 Jun 61. The object was bright, however the end of course and fire rules out Delta 1. There were one KOKOY recording prior to 1 Jul, 1959 Delta 2, however continuation on course rules this out. Speed is excessive for any possible balloon release from a ship or land. Report concluded only limited data and can be evaluated as the following chart. It is probably the same object as KOKOY 100% record card.

1. The following report was received by the Master of SS KOREAN BEAR of the Pacific Far East Lines and is forwarded for information.

"At 101118Z (June 1961) while taking evening stars, observed a bright object at latitude 19.25N - 116.20E bearing 320 degrees, altitude 60 degrees. Brilliance identical to that of Jupiter. Vehicle was directly overhead at 1121Z emitting fire and fragments and continuing on course bearing 140 degrees, altitude 20 degrees at 1129Z before it disappeared behind a heavy cloud formation with a brilliance of a 1st magnitude star."

2. The above sighting was confirmed by two other officers and appeared similar to Echo satellite in orbit direction, but did not reappear.
3. Comment: Master is ██████████, a sincere, intelligent individual who has furnished reliable information in the past.
